

WHAT IS PTURAS SOLO?

One-person, two-person or more, family, business, team, party participants hike without attachment to the time and date of the event. This is especially convenient because after buying a ticket you can go whenever you want. The most important moment is that you set yourself a restful time, a comfortable pace, you take whatever breaks you want, you can extend the track the next day after stopping.

Our goal is to give you the opportunity to walk without the restrictions of the event organizer, to let you feel free, to let you decide for yourself how long you will go along the route, visit the recommended places or how much time you will spend in the fresh air. The most important thing is the hardening of the organism, activity, getting to know the places of interest, no matter what the form.
